Advancing Dermatology Care Through Clinical Research

**EAST VALLEY
DERMATOLOGY CENTER**

In partnership with

**ARIZONA
CLINICAL
TRIALS™**

About Us

At East Valley Dermatology Center, patient care comes first.

Our dermatology team is committed to helping patients better understand their skin health and explore care options that may be available through clinical research. In partnership with Arizona Clinical Trials, East Valley Dermatology Center offers research studies for a variety of dermatologic conditions, including inflammatory, chronic, cosmetic, rare, and complex skin diseases.

Clinical research studies help evaluate investigational medications, devices, and treatment approaches that may one day improve care for patients with skin conditions.

3 Key Phases of Clinical Trials:

Phase 1: Earliest phase to assess **safety** and **side effects**.

Phase 2 & 3: Determine **safety, efficacy**, and optimal **dosing** in patients with specific conditions.

Research Areas

East Valley Dermatology Center and Arizona Clinical Trials may offer research opportunities for conditions such as:

- Acne
- Psoriasis
- Atopic dermatitis / eczema
- Hidradenitis suppurativa
- Rosacea
- Seborrheic keratosis
- Lentigo / age spots / sun spots
- Alopecia / hair loss disorders
- Vitiligo
- Melanoma and non-melanoma skin cancers
- Chronic hives / urticaria
- Autoimmune and connective tissue-related skin conditions
- Infectious skin diseases
- Chronic itch disorders
- Scarring and keloids
- Rare and genetic skin disorders

Why Participants Choose Us

- Access to investigational and emerging treatment options
- Experienced dermatology specialists and research staff
- Comfortable, participant-focused care environment
- Opportunities to participate in studies for a variety of skin conditions
- Dedicated support teams to guide participants through each step of the trial process

Why Consider Participating in a Clinical Trial?

Participating in a clinical trial is a personal decision. For many participants, research studies offer an opportunity to:

- Learn more about your condition
- Receive study-related care and monitoring from experienced medical professionals
- Access investigational treatment options not yet widely available
- Contribute to medical progress that may help other participants in the future
- Receive compensation for trial related time and travel, when available

Not every study is right for every participant. Our team will review the study details, answer your questions, and help determine whether a specific trial may be a good fit.

East Valley Dermatology Center is proud to offer clinical research opportunities for patients living with a variety of skin conditions.

Built for
Dermatology
Research.
Focused on You.
