**Annual Newsletter 2021**

**NEW! Cosmetic V-Soft Thread Lift**-Nonsurgical Facelift

V Soft Lift® is a sterile single use polydioxanone suture in a cannula(a tube that can be inserted into the body). It is a modern, innovative non-permanent thread, not to be compared to traditional permanent threads.

There are two types of threads, smooth and cogged. The smooth threads are to be placed in a grid-like pattern for a skin tightening effect. Cogged threads form a support that lifts the sagging skin.

Keep your skin Happy and Healthy in 2021.

**XTRAC**<sup>®</sup>  
LIVE CLEAR. LIVE FREE.

**XTRAC Laser**- for Psoriasis, Vitiligo, and Dermatitis

## How It Works!

**Psoriasis**-Using a carefully focused beam of laser light delivered through a sophisticated liquid light guide delivery system, the XTRAC system is designed to clear unsightly psoriatic skin plaques quickly and effectively. Because it concentrates light on active lesions, XTRAC allows your health care technician to deliver the high therapeutic doses necessary for rapid clearing without risk to healthy skin.

**Vitiligo**-XTRAC treatments can minimize and, in many cases, even eliminate vitiligo depigmented patches. The XTRAC excimer laser delivers a targeted beam of UVB light and only the areas of skin affected by vitiligo receive the laser energy.

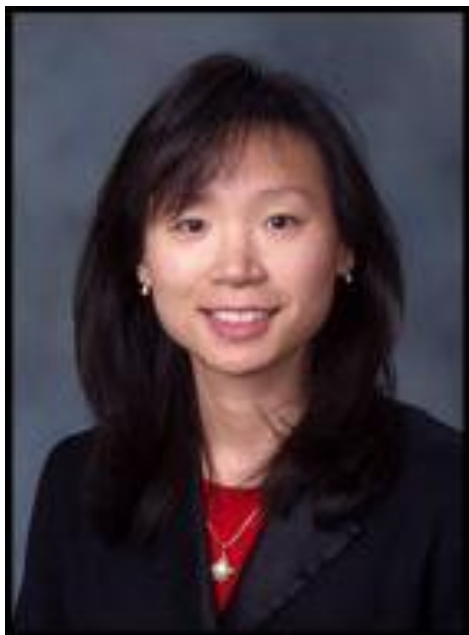

### East Valley Dermatology Rx Corner

Ask your Dermatologist today to see if your prescriptions are available to fill before you leave the office.

- Use your prescription benefits and save yourself the drive elsewhere
- Lower cost options available
- Ask about a cost comparison before purchasing
- Remember to bring in your prescription insurance card to your next appointment.
